## Checkpoint 1 Sprint C feedback 24-11-2022

I had to work more than my fair share and even had to change someone else's code to make it actually work as intended.

Dragos works very well. He is dedicated to the project and has genuine interest in it. The only tip which I could give is to be more punctual.

I like that you always pick-up tasks proactively and go above and beyond to complete them by working outside of the group project days or developing stuff that was not your job initially.

Dragos has done a great job on his tasks so far and is good at updating everyone about the state of his tasks. In case he gets stuck, he will make sure to let us know on time so we can help him, which also indicates he is very involved in the project. [Read less](#)

Communicates well with the team, you don't shy away from difficult tasks and you finish your tasks on time. Great work
